INTRODUCTION

Manual Auction Selective Shilling

MASSS token- The sole purpose is mainly focused on eradicating poverty by some means helping out people based on its own performance in the 2 Trillion Crypto Industry.

MASSS is a manual driven token which attempts visible Charity donations via its own community by offering its allocated tokens into auction making use of block chain technology.

The team will be holding the project for the next 15 years by handling all auctions with a new manual selective method. Be part of our community as this project is expected to be reaching a greater visibility among all other crypto projects by its own Auction Protocol. Hop in further for major rewards included in the project

MISSION

\$MASS is developed trying to contribute its part to re-tribute people who are suffering from poverty and people suffering from serious health issues by sacrificing its native coin to community based on its own token performance. Poverty is a global issue that affects billions of people, transcending borders, cultures, and socioeconomic statuses. It deprives individuals and families of basic human rights, including access to food, clean water, education, and healthcare.

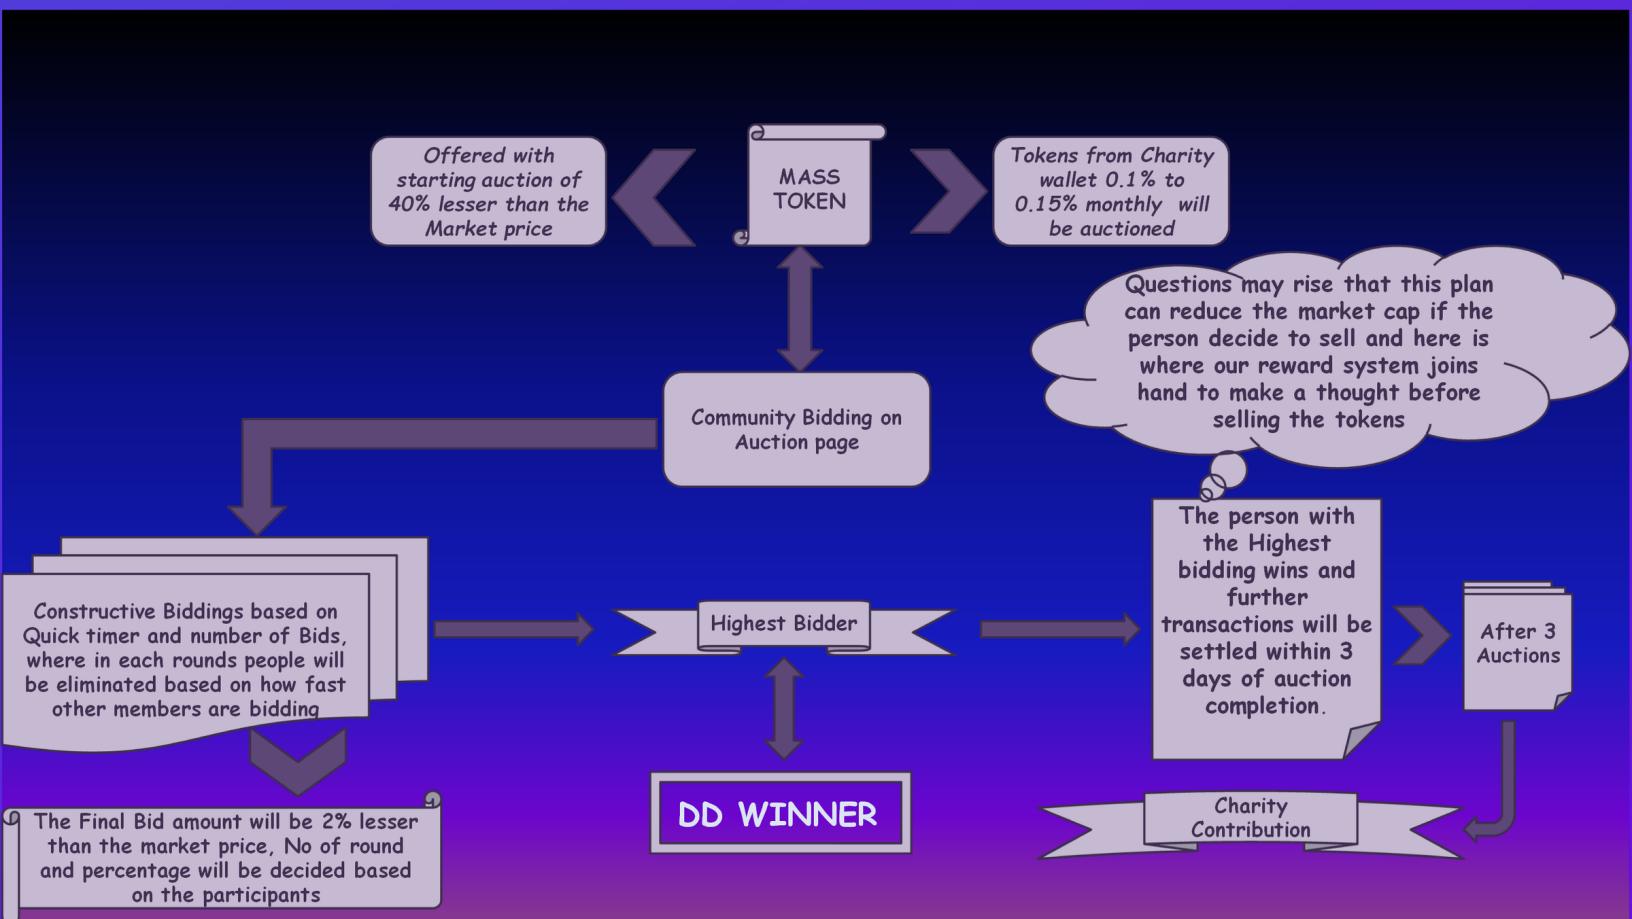

Lack of access to education, healthcare, and job opportunities are all structural barriers that hinder individuals and communities from breaking free from the cycle of poverty. Systemic factors encompass issues like corruption, and political instability. Discrimination based on race, gender, or social class can lead to unequal distribution of resources and opportunities. Influence by the larger social and economic environment factors such as health, education level, and family structure can significantly impact an individual's ability to escape poverty. Therefore we have came up with the idea of a new Auction Protocol which helps in contributing the people in need either by education/health.

Auction Protocol

MANUAL AUCTION SELECTIVE SHILLING

\$MASS Auction will be functioning in the above process, the native coin from the Charity vault will be brought into auction where the eligible players will be playing the game by placing the bids, the unique and highest bidder will be declared winner, more details in upcoming pages

Auction Protocol

MANUAL AUCTION SELECTIVE SHILLING

\$MASS is deemed to perform in resemblance of as FIRST PRICE SEALED BID Auction, but with a revolutionary twist in existing method.

First Price Sealed Bid Auction

A first-price sealed-bid auction is also known as blind auction, where all bidders simultaneously submit sealed bids so that no bidder knows the bid of any other participant. The highest bidder pays the price that was submitted.

For Example:

Lets Consider three bidders (A, B, C) are participating in the auction. Each of the bidders set a price of how much they are going to pay for as Asset with a starting price of 990\$:

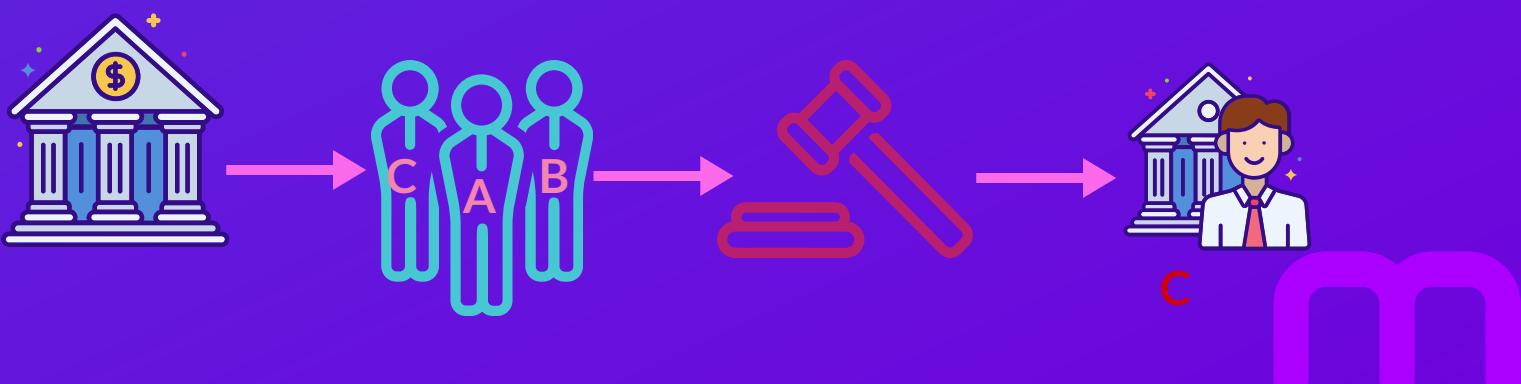

Bidder A = \$1000

Bidder B= \$1050

Bidder C = \$1100

The highest bid in this auction is 1100\$. Bidder C wins the auction and pays \$1100 for the asset to the owner.

The highlight of the above Auction each Bidder will not be able to see or guess other Bidders proposal.

Auction Protocol

MASSS Auction Protocol

In MASSS Auction, we follow the resemblance of first-price sealed-bid auction, but here it wont follow the usual rules of existing methods and a new protocol is developed,

MASSS Protocol Model in BlockChain

- MASSS Auction Protocol is subjected to work under the below subjected formula,

$$\text{FIXED MASSS} = (\text{AUCTION VAULT}/\text{PLANNED_YEARS} * \text{MONTHS})$$

$$\text{AUCTION VAULT} = 25\%$$

$$\text{PLANNED_YEARS} = 50 \text{ years}$$

$$\text{MONTHS} = 12 \text{ months}$$

- The fixed amount of 4200 \$MASS token from Auction vault will be brought in Auction monthly.
- The starting price of \$MASS tokens decided based on market price of \$MASS on the announced day.
- The starting price of \$MASS token will be 20 to 40% lesser than the market prize and the number of winners will be decided based on market price.
- The Revenue model of MASSS Protocol is under,

$$\text{MASSS REVENUE} = (\text{FIXED MASS}/\text{PROBABLE WINNERS}) * \text{MASS_PRICE}$$

$$\text{FIXED MASS} = 4200$$

$$\text{PROBABLE WINNERS} = \text{CONSTRUCTIVE BASED ON PRICE}$$

$$\text{MASSS_PRICE} = 20 \text{ to } 40\% \text{ lesser than market price}$$

- Eligibility will be checked based on the BNB holdings in each Bidders/Players wallet (Should be having a minimum and maximum value required as subjected to Auction).
- Once all eligible Players are in the Auction will be started where each bidder will be given a chance to do a single Manual entry

Auction Protocol

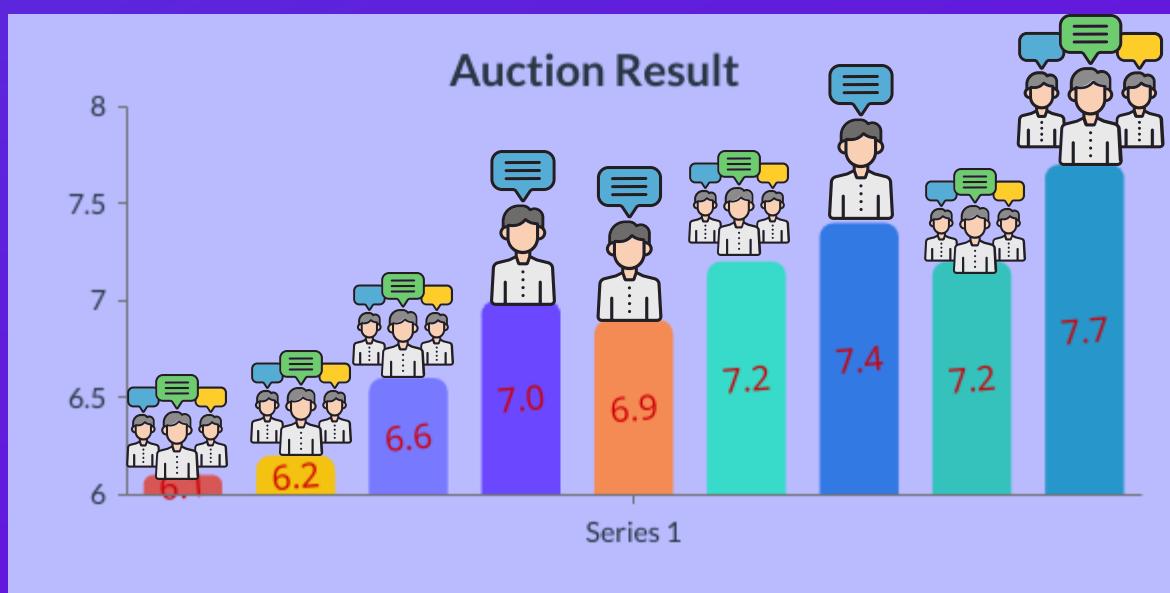

- The Bid made by each player wont be visible to other players until the end of Auction
- once the Auction is over, the results calculation will happen and below rules comes to play,
- If there are any multiple bidders for a same value then the Bidders will be eliminated
- The constructive (will be multiple rather than single) players with a Unique and highest value bid will be declared winners
- In case if all entries are a multiple ones, the one with lowest number of entries and highest will be the winners

For Example:

If the Market Prize of \$MASS is \$10 and number of tokens from auction vault is 4200 and constructing probable winners of 21 (will be increased in actual Auction), then MASSS_PRICE will be 6\$ (40% percent lesser), now the Revenue formula results in 200 \$MASS for winner with a possible buying value of \$1200 per winner

So the minimum value of BNB value is 1200 and Maximum value will be 1600\$ which should be present in each Players Wallet,

Players can Bid anywhere in between 6.1\$ to 7.9/8\$ (Decimals subjected to be increased as per \$MASS Market price 1 to 50 - 0.0 and 50 to 100 0.00 etc..)

THE UNIQUE PLAYERS WILL BE DECLARED WINNERS AS SHOWN ABOVE

Auction Protocol

MASSS MAGIC = MASSS WINNERS

EITHER YOU END UP IN LUCK WINNING THE TOKENS FOR A LOW VALUE UPTO 40% OR IN 20% BASED ON BIDS PLACED BY THE PLAYERS

Why Auction into own Community?

- **As we are forming a chain of helping hands along with our community, we want to auction our own tokens dedicated to them rather like other teams where dumping all tokens into exchanges for profit.**
- **As we are Auctioning our own tokens both community and our goal gets benefited, while community gets \$MASS in a lower price and Revenue gets generated by the tokens bought by Players using BNB**
- **In this way we make a strong trust between both ends and share 5% of the overall revenue with the top holders of \$MASS and 80% percent with Charity donations and 15% for further project development.**

The future of MASSS

- **After a successful journey of 1 year we either plan to bring Auction implementation with other Major Cryptocurrencies into play and NFTs if they really require for community.**
- **We will be taking each decisions based on community approval.**

Auction Protocol

VISIBLE CHARITY CONTRIBUTION

In this Crypto market majority of the various projects would allocate a certain percentage of its token for charity/helping people but what makes our MASSS token different from them? Well even though those various project declare that they contribute to charity there are no clear proofs for that either the projects team redeem it for themselves or just contribute a little amount to people.

We plan to change this way by using our community members to engage in contributions towards society by spending the auctioned amount for someone in need.

The chosen community member will engage in the action and be responsible for handling the contribution carefully

Our initial plan is to taking care of studies for the children who are in poverty/need by visiting foundations/charity

We also plan to take care of patients suffering from cancer and are unable to afford for an recovery surgery

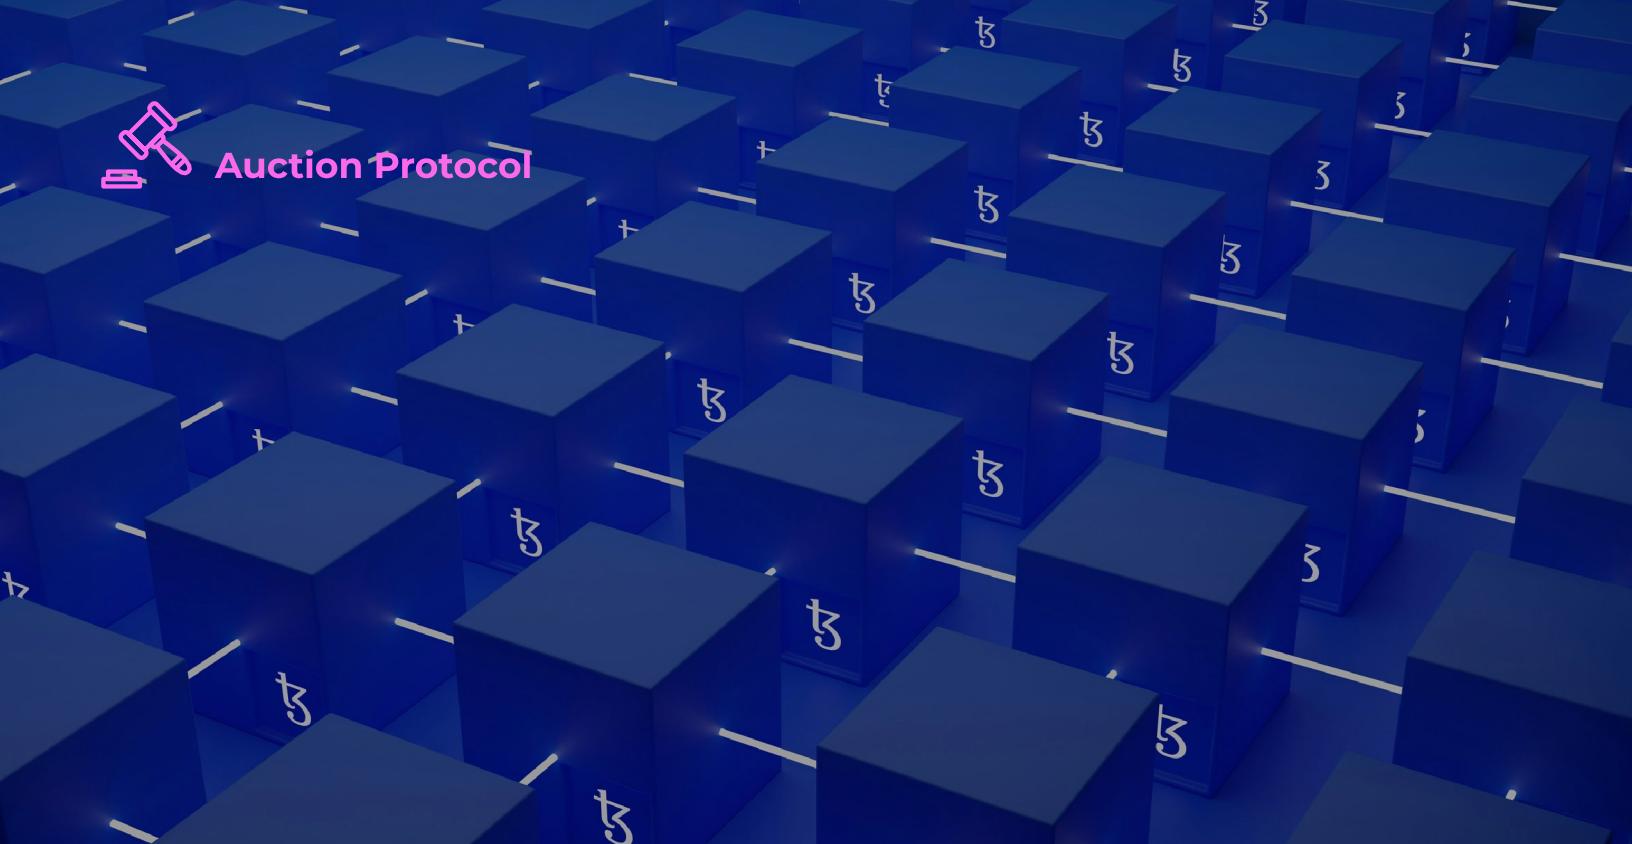

Majority of our plans will be in action by our own community people and so we maintain the constant support and trust among the members

More Plans will be scheduled based on our yearly performance

Auction Protocol

WHY BEP-20?

Why we chose BEP-20 ?

After having a clear look into how the blockchain technology works and calculating the positive and negative features we decided to go with BEP-20 which offers various functions in low gas fees compared to ERC-20. Considering the scheduled Airdrop plan and other various reward plans we decided to go with BEP-20 as it always offer low gas fees. We also have considered our users can also face lesser gas fees for transactions to and fro of the MASSS token inside the BEP-20. Token transfers in BEP-20 will be much faster than other platforms and is also adoptable to many applications these are the main reason we went with BEP-20 as a blockchain for our token creation These features were essential for adoption of MASSS.

TARGET

The main target of MASSS is to eradicate poverty as far as it can so the tokens sole purpose of generation can be achieved. We don't want to explain anything further on our target as we believe in only,

**ACTIONS SPEAK
LOUDER THAN
WORDS**

BENEFITS FOR COMMUNITY & HOLDERS

Rewards Plan

Airdrop for Holders

- **Each Token Holders will be eligible for receiving Airdrops for upcoming years, we have a fixed percentage for Airdrops which is planned for next 8 years.**
- **The Airdrops will be done each month from the launch of first CEX.**
- **The Airdrop will be boosted based on the tokens holding percentage**
- **For Example- If a person who won in the Auction might hold a certain percentage of tokens, so his airdrop boost will be higher than the other holders.**
- **So the more tokens you hold the more wealth you make for upcoming years**
- **We will also plan a special contributions to the holders based the token performance in the Market**

Community Benefits

- **We plan to organize community meetings in selective countries once we reach a good and organic members and based on how good our Token performs in the market**
- **We will take care of all expenses regarding the meetings we organize like food and gifts for all the members who shows interest in the meetings organized**
- **We also will reward the person with most holding/long holder with certain percentage of profits that we made throughout the year**
- **More ideas will be planned post our launch and successful run**

ROADMAP

**2024
Q1**

- ❖ Smart contract launch on BSC Main Net
- ❖ Telegram Community gathering
- ❖ Creation of Twitter page
- ❖ Forming Discord Server
- ❖ Website launch
- ❖ Audit and KYC completion
- ❖ Initiate Marketing
- ❖ IIC Program launch

**2024
Q2**

- ❖ Acquiring partnerships with leading crypto experts
- ❖ Pinksale Fair Launch
- ❖ Executing all Marketing plans

**2024
Q3**

- ❖ DEX Launch- Pancake Swap
- ❖ First CEX listing
- ❖ Initiating first airdrop for community
- ❖ Initiating Special airdrop for IIC contributors
- ❖ First MASSS Auction

**2024
Q4**

- ❖ Second CEX listing
- ❖ Airdrop continuation for community
- ❖ Special airdrop continuation for IIC contributors
- ❖ Second & Third MASSS Auction
- ❖ Initiating the very first visible charity donation

TOKENOMICS

Auction Protocol

BRIEF ALLOCATION

Token Circulation Plan

- Complete PinkSale Fair launch/Pre-sale(ICO/Presale)- 11,00,000
(75% to 80% liquidity locked for 6 Years and balance for top CEX agreements)
(Tokens will be locked initially for 10 days and then 10 percent will be released in each month in a period of 10 months to investors)
- Marketing & Advisors- 3% [300,000] (separate wallet with more visibility)
(Will be locked and released over a period of month/year as per each agreement)
- Staking- 11% [11,00,000]
(Will be allotted on launchpads/CEX)
(will be slow and steady for next 11 years)
- Team Allocation- 6% [600,000] (PinkLock in PinkSale)
(3% Locked for 15 years, 2% will be locked for 10 years and 1% Locked for 5 years - will be released 5% of yearly allotted supply each month from 2029 monthly)
- Listings- 10% [10,00,000] (Released based on each CEX agreements)

Liquidity, Reward & Auction Plan

- Liquidity- 20% [20,00,000] (10% Dex- PANCAKESWAP Initial) (1% Buy and Sell Tax)
(1% Tax will be a revenue which will be later shared with holders and 1% for yearly community plans)
- Ecosystem {Rewards & Developments} - 14% [14,00,000]
10% Airdrop (2% for IIC (first 200 buyers in Launchpad) - will be for next 4 years from launch on CEX-fixed percentage) (8% for Community/holders- slow and steady for next 8 years from launch on CEX- fixed Percentage)
4% for project future developments
- Auction- 25% [25,00,000] (Planned for next 50 years with a fixed amount each year)
(Auction Execution plan- As per contract 4200 tokens will be published for auction)
(SEPERATE MASSS AUCTION VAULT- 0x4c4fb05d797b1FF291764562E749A11E62fa456B)

DISCLAIMER

- All crypto currency projects are risky and volatile and subject to market forces beyond the control of the company, and / or founder/promoters and or any other members of the Team. External factors such as regulatory developments, market sentiment, technological vulnerabilities, and macroeconomic trends may impact the value of any tokenized products and assets.
- Furthermore, the lack of regulatory oversight and the novelty of the crypto space can expose investors to security breaches, and operational risks. The purpose of this Token is for Auction only within Masss project.
- Purchase of this token does carry risk and does not provide ownership of the company, shares, assets, equity or any right whatsoever to any of the business operations, other than having the utility rights to entertainment, imaging and other offers and services associated with the Club ecosystem.
- Please do your own research, do not purchase tokens with more money than you can afford to lose and complete your own full due diligence before considering if the purchase of this Token or any project for that matter is right for you.
- Always seek professional financial advice before engaging in crypto currency token purchasing activities. The founders, promoters and team will not and can not be held responsible for any purchase decision you make, regardless of gain or losses.
- Remember to invest responsibly, as all crypto currencies carry risks and the potential use cases and benefits should be considered carefully as the driver for any decisions and not for speculative purchase reasons. Understand the true value of the token is in the utility it provides within its own community ecosystem.
